PROFESSIONAL SUMMARY

Senior Software Developer with 4+ years building and scaling production-grade web and backend systems. Deep expertise in Node.js, Angular, React and Java, with hands-on experience architecting real-time platforms — including a ride-matching system serving 100,000+ monthly active users. Proven ability to lead development end-to-end, from system design and architecture to production delivery - with a strong track record in API security, real-time data sync, and high-scale B2B SaaS products.

WORK EXPERIENCE

Senior Software Developer | Cabswale

[Play Store App Link](#) Dec 2024 – Present

- Architected a real-time ride-matching algorithm optimising driver suggestions by proximity, availability, and rating - reducing average user-driver matching latency by 30% at 100,000+ monthly active users.
- Designed and built a peer-to-peer driver community platform handling real-time communication and network-building at scale, growing to 100k+ MAU within months of launch.
- Migrated critical asynchronous workflows (payment reconciliation, retries, webhook processing) from Firebase triggers to event-driven Java worker services for improved reliability, idempotency, and scalability.
- Hardened platform security by implementing JWT-based authentication middleware, rate limiting, and input validation across all API endpoints - reducing attack surface and achieving zero security incidents post-launch.
- Leveraged Google BigQuery for analytics reporting on 6M+ bookings, tracking, and payment records, enabling scalable business insights and backend data workflows.
- Led end-to-end backend development in Node.js and Express.js, collaborating across product, design, and QA teams to ship production-ready features on schedule.

Full-Stack Software Developer | Build With Innovation Pvt. Ltd.

Mar 2022 – Nov 2024

- Served as lead developer on 5+ simultaneous client projects spanning Angular SPAs, Node.js REST APIs, and Firebase integrations - delivering all within agreed timelines.
- Built and shipped Ignite Retail, a large-scale B2B SaaS platform serving 10,000+ users - owning both Angular frontend and Node.js/Firebase backend, with Java microservices and real-time Firestore sync supporting concurrent multi-user operations without data conflicts.
- Built SmartPills, a multi-platform pharmacy management system integrating Twilio (SMS) and SendGrid (email) for real-time order alerts and prescription workflows - improving medication adherence across patient and pharmacist workflows.
- Mentored junior developers, reduced post-release bug rate by ~25% after introducing mandatory PR review coverage.

KEY PROJECTS

RideTrack - Real-time Driver Dashboard

May 2026

Tech: React · Node.js · Express.js · MongoDB · Socket.io · TypeScript <https://ridetrack-one.vercel.app/>

- Built a full-stack real-time driver tracking dashboard in React - live location updates via Socket.io, REST APIs in Node.js/Express, and MongoDB for trip and driver state persistence.
- Implemented React Context + custom hooks for state management; optimised re-renders to handle 50+ concurrent live driver feeds without UI lag.
- Designed RESTful API with JWT auth, rate limiting, and input validation on the Node.js backend - applying the same security patterns used in production at Cabswale.

Ignite Retail

Apr 2023 – Nov 2024

Tech: HTML, CSS, TypeScript, Java, Angular, Node.js, Firebase ignitehumans.com

- Built a large-scale B2B retail platform enabling organizations to onboard, manage inventory, and serve customers digitally. This platform served more than 10k users directly.
- Owned both front-end (Angular) and back-end (Node.js/Firebase) development, delivering a responsive and performant experience.
- Implemented real-time data sync with Firebase, supporting concurrent multi-user operations without data conflicts.

SmartPills

Dec 2022 – Feb 2023

Tech: HTML, CSS, TypeScript, Angular, Node.js, Firebase, Twilio, SendGrid smartpills.in

- Developed a multi-platform system bridging patients and pharmacists with real-time order management, SMS (Twilio), and email (SendGrid) notifications - improving patient medication adherence.
- Built a pharmacist admin panel for managing prescriptions, inventory, and customer queries from a unified dashboard - reducing manual workflow time significantly.

Gitlet

Dec 2021 – Jan 2022

Tech: Java [Source code](#)

- Built a version control system from scratch in Java implementing core Git internals: commit trees, branching, and merge conflict resolution.

TECHNICAL SKILLS

Languages	JavaScript (ES6+) • TypeScript • Java • HTML5 • CSS3 / SCSS • SQL
Frontend	Angular • React • Ionic • Bootstrap • jQuery • RxJS
Backend	Node.js • Express.js • Java • REST APIs • Socket.io • WebSockets • Microservices
Databases	Firebase Firestore • MongoDB • MySQL • Redis
Cloud / Tools	Firebase - Google Cloud Platform (GCP) • Docker • Git • GitHub • Postman • Bigquery • CI/CD • Jest
Concepts	REST APIs • Real-time Systems • API Security • Agile / Scrum

EDUCATION

Master of Computer Applications (MCA)

Jul 2020 – Jun 2022

Vivekananda Institute of Professional Studies, GGSIPU — New Delhi • 87.6%

B.Sc. (Hons.) Computer Science

Jul 2017 – Jun 2020

University of Delhi — New Delhi • 7.14 GPA

Senior Secondary (Class XII) — CBSE

2016 – 2017

- 91.6%

CERTIFICATIONS

- AWS Machine Learning - Getting Started with AWS ML services (Jun 2020) [View Certificate](#)
- JavaScript Certification - Core to advanced JavaScript concepts (Apr – May 2020) [View Certificate](#)
